The RG Architects Studio design atelier emerged as a natural continuation of the atelier led by Radomír Grafek – RG Project, which has been active in the architectural scene since 2015. The atelier aims to create original architecture based on the principles of simplicity, purity, balance, and light. These principles stem from the initial visions of the builder and mutual dialogue with individual investors, emphasizing a strong concept, executed detail, and the unique mood for the given location.

Projekt eGALAXIE Kindergarten Studio Radomír Grafek ateliér RG Architects, který vznikl v roce 2015, je přirozeným pokračováním ateliéru RG Project. Ateliér se zaměřuje na tvorbu originální architektury založené na principech jednoduchosti, čistoty, rovnováhy a světla. Tyto principy vycházejí z počátečních představ stavebníka a vzájemného dialogu s jednotlivými investory, kdy je kladen důraz na silný koncept, provedení detailu a na jedinečnou atmosféru daného místa.

정리와 기억

Varnsdorfu. Mateřská škola nabízí celkem devět tříd – čtyři třídy pro nejmenší děti, každá s kapacitou 20 dětí, a pět tříd pro starší děti, každá s kapacitou 25 dětí. Celková kapacita školky je tedy 225 dětí. Kromě toho zahrnuje projekt také rozsáhlé venkovní prostory. Kindergarten GALAXIE eR Varnsdorfu se nachází na okraji města, v blízkosti lesoparku a v těsném sousedství základní školy. Budova je navržena jako jednopodlažní stavba s plochou střechou, která se svým tvarem dokonale přizpůsobuje okolní krajině. Tato budova se nachází na okraji města, v blízkosti lesoparku a v těsném sousedství základní školy. Budova je navržena jako jednopodlažní stavba s plochou střechou, která se svým tvarem dokonale přizpůsobuje okolní krajině.

Kindergarten GALAXIE eR Varnsdorf is the perfect solution for the city's kindergarten needs. It will have nine classes in total – four classes for the youngest children, each with a capacity of 20 children, and five classes for older children, each with a capacity of 25 children. The total capacity of the kindergarten is therefore 225 children. In addition to the classrooms, the project also includes extensive outdoor spaces. Kindergarten GALAXIE eR Varnsdorf is located on the edge of the city, in the vicinity of a forest park and directly adjacent to a primary school. The building is designed as a single-story structure with a flat roof, which perfectly blends into the surrounding landscape.

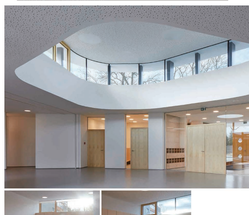
초등학교와 직접 맞닿은 위치에 있습니다. 유치원 GALAXIE eR Varnsdorf는 총 9개의 학급으로 구성되어 있습니다. 가장 어린 아이들을 위한 4개 학급은 각각 20명의 정원을 수용할 수 있으며, 더 큰 아이들을 위한 5개 학급은 각각 25명의 정원을 수용할 수 있습니다. 따라서 유치원의 총 정원은 225명입니다. 교실 외에도 이 프로젝트에는 광범위한 야외 공간도 포함되어 있습니다. 유치원 GALAXIE eR Varnsdorf는 시내 외곽에 위치하며 숲이 우거진 공원과 인접해 있고 초등학교와 바로 이웃하고 있습니다. 건물은 단층 구조로 설계되었으며 평평한 지붕을 가지고 있어 주변 풍경과 완벽하게 조화를 이룹니다.

Plan

The new GALAXIE eR Kindergarten for 50 children left at JDP, addresses the increasing demand for new preschool facilities in the town of Varnsdorf in the Ústí region. Situated at the edge of the town, adjacent to a forest park and a primary school, the building stands as a single-story brick structure with a regular elliptical floor plan and an internal elliptical atrium. It is covered by a flat green roof with a low parapet and an elevated roof section above the multifunctional hall.

The shape of the building was designed with consideration for the surrounding development, existing communication relationships, corner position, and the plot's orientation to the cardinal points. Classrooms for the youngest children and all other rooms into the surrounding landscape and adjacent forest park. The building's placement created a high-quality public space in front of the nursery with elliptical green islands, also allowing for natural pedestrian circulation.

Plan

The organic shape of the kindergarten embodies openness, freedom of movement, harmony, and beauty – essential nourishment for the human spirit, desirable for children's development. Inside the building, a green atrium with newly planted values trees opens up, creating a beneficial place for children to relax and play. It symbolizes the idea of the forest park, which the kindergarten directly adjoins. The building's organic shape will then harmonize even further once the new vegetation has grown and the trees have reached their full height.


Kindergarten GALAXIE eR Varnsdorf
Project status : Realized / Kapusín Street
Year of design : 2021-2022
Gross floor area : 2,500 m²
Site area : 6,500 m²
Number of floors : 1 (+ terrace)
Design team : Ondřej Tesařík, Ivan Hall – chief engineer
Client, Investor : municipality – Ing. Jaroslav Jakubec
Author's supervision : Radomír Grafek – construction part
Construction : Stavby Liberec
